

Swift Series (EU Standard Series)

Product Overview:

Swift series Mini version complies with EU Standard Series related standards and specifications, is plug and charge (optional) type, can be carried with the car, and is lighter and has a smaller power of 3.5KW or 7KW. The machine is economical and practical, with complete functions, and can be connected to the car BMS, equipped with a charging status display screen, Achieve intelligent control of the entire charging process. This product is compact and beautiful, can be carried with the car, and is suitable for home use.

Product Advantages:

Convenience: Compact in size, lightweight, easy to carry and move for charging electric vehicles at any time.

Security: Equipped with multiple security protection mechanisms, such as overcurrent, overvoltage, overheating, etc., its shell is also designed with fire and water resistance, further enhancing its security

Fashion: The exterior design is stylish and exquisite, PC materials, fire-resistant and flame-retardant, high impact resistance level.

3.5/7KW EU Standard Series

Product Model		LS-ND-035-10112	LS-ND-07-10112
System power	Rated power	3.5KW	7KW
Input parameter	Rated input voltage	AC230V±10%	AC230V±10%
	Rated input current	16A	32A
	Frequency range	50/60HZ	
Output parameter	Output voltage	AC230V±10%	AC230V±10%
	Output current	16A	32A
Basic characteristics	Protection level	IP65	
	Startup method	Plug&Play	
	Installation method	Portable, wall mounted	
	Impact protection	IK08	
	Communication interface	/	
	Protection functions	Protections of emergency stop, overcurrent, overvoltage, high temperature, short circuit, lightning, grounding.	
	LCD screen	1.5-inch color screen	
	Cable length	5M or optional	
	Cooling method	Natural cooling	
	Working temperature	-20°C ~+50°C	
	Storage temperature	-40°C ~+70°C	
	Relative humidity	5% ~95%	
	Altitude	≤2000	
	Product size(*L*W*H)	200*70*50mm(L*W*H)	
	Packaging size(L*W*H)	370*310*80mm(L*W*H)
